All business in connection with Government Lands promptly attended to. Settlers located free on choice homesteads. Homestead entries made. Full list of all lands open in the Moose Jaw District.

DR. P. F. SIZE, D. D. S. & M. D. S. SURGEON—DENTIST, REGINA, Assa., Visits Moose Jaw at C. P. R. Dining Hall, the 25th & 26th each month. Extracting, Filling and Plate work at special prices. Home Surgery, South Railway St., Regina.

LOST.

On Saturday, November 8th, one Bay Gelding, two years old, fawn and hind foot white. \$10 Reward will be given for such information as will lead to their recovery. Information may be left at the Times of Moose Jaw.

T. W. ROBINSON'S.

TAMILKANDE IS TEA.

TOUCH the gentle lyre,
Tune the plaintive lute,
Twang upon the harp,
Toot upon the flute:
Tis of Tea we sing—
TAMILKANDE TEA:
Tell the world at large,
They should all agree,
This is joyful news,
That such T can be bought
Tomahawk the man,
That sets advice at naught.
Taboo all other Teas;
TAMILKANDE'S BEST:
Try it right away—
Twill always stand the test,
Then thump upon the drum,
Trumpet with good zest;
This our song shall be—
TAMILKANDE'S BEST.

FOR SALE AT
T. W. ROBINSON'S.

SOO ROAD
IS COMING TO
Moose Jaw

But we are here ahead and going to stay, with a full stock of

FLOUR & FEED

We cannot give you 100 lbs. for \$1.00, but we can give you

PATENT FLOUR \$2.25
STRONG BAKERS FLOUR \$2.00

Our grades of Flour are guaranteed
as good as any on the Market.

Wine, Liquors and Cigar Store.

I have just received my winter
stock of the above goods, consisting of the finest brands of the best known manufacturers in both the foreign and home markets. So if you must or will drink, take my advice and imbibe only the choicest liquors procurable in the wide world.

WARNING TO FARMERS!

Great Loss to the Country on
Account of Smut—Do not Sow
Seed Without Treating it
for Smut.

The following circular has been
issued by the Winnipeg grain and
produce Exchange:

"The immense damage caused by
smut to the crops of 1891 and 1892,
and the subsequent trouble and difficulty experienced in handling smutted
wheat has assumed such proportions,
that the Winnipeg Grain and Produce
Exchange considers it of the utmost
importance that the subject of Smut
should be brought to the attention of
every grain grower in Manitoba and
the North-West Territories, in order
that, so far as possible, there should
not be a repetition of the experience of
these two years. Our market is no
longer confined to Ontario and Quebec.
We now have to seek British and
Continental markets, and the foreign
buyer still looks with disgust on our
grain, owing to the deplorable smutted
condition of the 1891 crop. With
the remedy in his hands, no farmer
should prove untrue to his own interests,
or the interests of the country
by allowing this trouble to continue.
The principal cause of the evil is the
sowing of smutted and other poor seed,
and the failure to treat even apparently
good seed before sowing.

Take the following illustration of
the loss obtained by sowing poor seed:
Say a farmer sows 100 acres. If
with treated or other poor seed, the
cost will be—175 bushels at 40c.—
\$70; when good grain will cost—133
bushels at 65c.—\$86.45 or a difference
of \$16.45, for 100 acres. Now experience
has proved, from a actual test
at the Experimental Farm at Brandon
and Indian Head, that the loss by
sowing poor seed is at a very low
estimate, \$250. There has been already,
of the 1892 crop, nearly 1,000
cars of smutted wheat inspected at
Winnipeg alone; representing on this
quantity, a loss, through difference in
value of, \$100,000 to farmers.

A sample of smut, taken from the
cleaning machines of our large mills,
was sent by the Exchange to Professor
Saunders, Director of the Central Experimental
Farm at Ottawa, and he
writes as follows:—
"The smutty grain you sent is a very
bad sample of the best or stinking
smut. This can be got rid of to a very
large extent by treating the grain
before sowing. From experiments
carried on at Indian Head, this year
we are able to submit the following results:
Where very smutty grain was
sown, about one half the crop was
smutted. The same grain treated in
proportion of a pound of bluestone
dissolved in water and sprinkled in
ten bushels of wheat, the proportion of
smutted wheat did not exceed five
per cent. Where one pound of bluestone
was used to five bushels, the
grain was almost entirely free from
smut. Very similar results were obtained
last year, both at Brandon and at
Indian Head, and the importance of
this subject cannot be impressed too
strongly on farmers. Many cases have
occurred this year, to my knowledge,
in Manitoba where the grain was so
smutted as to be unsaleable, and
where it is so easy to remedy this
trouble, it seems a pity that farmers
should neglect to take the necessary
precautions. If the treatment of seed
grain could be made general over the
Province for several years, the disease
might be almost eradicated."

After handling several millions of
the 1891 and 1892 crops this Exchange
unhesitatingly concludes that the de-
pression in value of our crops from
smut is very much greater than from
frost.

REMEDY.

Choose the best and soundest seed
you can procure, and sink it for ten

minutes in brine of the ordinary
strength used for pickling pork (that is
in which an egg or a potato will float)
stir the seed well and drain off the
light grains, smut balls and dirt, which
rise to the surface. Then take out
the seed and immerse in a solution
composed of one pound of bluestone,
dissolved in a pailful of warm water,
(for every five bushels of seed to be
treated). The seed may be placed in a
basket or sack and plunged into the
bluestone mixture, where it should be
kept until every grain has been
thoroughly wetted. Now, drain the
seed, and dust it with lime until the
grains are white, and they will dry
quickly; while germination will be
greatly assisted.

The remedy is simple! Do not fail
to use it! See that your local
merchant has plenty of bluestone, and
get your own supply as soon as possible.
Do not delay or the merchant's
supply may be exhausted. Good bluestone
is of a distinct blue in color and
without any deposit of whitish
substance upon it."

With Lead and Steel.

MACLEOD, N. W. T., Mar. 7.—Last
night about ten o'clock, H. H. Nash,
farm instructor on the Polgan reserve,
fifteen miles west of Macleod, heard a
disturbance among the horses and went
out to investigate. He saw two Indians
who walked up to him and when
within arms length one pointed a
revolver at Nash and fired. Nash threw
up his arms and dodged his head to
one side in time to escape the bullet
fired at his head, but lost the middle
finger of his right hand. Nash then
reached for his revolver, and while
drawing it the other Indian sprang at
him with a knife, giving him a serious
gash below the eye. Nash then fired
at both Indians, who turned and fled,
pursued by Nash, who kept up his
fusillade until his revolver was empty.
Nash's injuries are not serious. It is
not known whether the Indians were
hit or not. Thirty police left for the
scene of disturbance this morning to
investigate and make the necessary arrests.
The trouble arose over some
ration stealing business. There is no
excitement whatever over the matter
here.

Protecting the Plans.

OTTAWA, March 6.—A committee of
the board of trade waited on the
minister of the interior and laid before
him the necessity of putting up a new
fire-proof building for the housing of
the geological and natural history
museum. In addition there are lying
in the basement of the eastern block
charts, plans and field notes of the
Northwestern Territories, containing
records of the work of many surveys
that have been made by the department
of the interior since confederation.
These cost \$5,000,000 to make
and if lost could only be replaced by
the expenditure of a similar sum.
Daily promised to submit the matter to
the cabinet.

PRIVILEGES WITHDRAWN.

Another privilege has been taken
from the civil service in the matter of
superannuation. Heretofore persons
who received a permanent appointment
in the service after a period of
service as temporary clerks have been
allowed for the purpose of superannuation
to count the latter upon payment
into the fund the statement that
would have accrued during their
term of temporary service. An order-in-council has been passed decreeing
that hereafter the term of superannuation
shall commence with the date of permanent appointment.

Shooting a Bull.

OTTAWA, March 8.—The blessing of
a bull for the Northwest missions is as
sounded for next Sunday at the Basilica.
Father Lacocque will deliver the
sermon.

1897-1898 EDUCATION

Mr. Goggin at Winnipeg as
author of Memorandum for
Education.

Winnipeg, Mar. 7.—The city and
provincial normal schools and the in-
terests of education in general through-
out Manitoba, will shortly lose the
services of Principal D. J. Goggin, if
the North West Government have
their wishes conceded and the Local
Government does not make a big ef-
fort to retain their services for
normal work, which is a large amount
he has successfully placed upon the
most excellent systematic basis.

Some time ago, Premier Balfour
was in the city and in the afternoon
was clearly aware that one of the
objects of his visit was to speak with
Mr. Goggin on educational matters,
particularly relating to an exhibit at the
World's Fair. But later information
seems to bring forward another result
of the consultation. Yesterday, Mr.
Goggin received from the N. W. T.
Government an offer of \$10,000 a year,
and expenses, if he would accept the
position of director of teachers' in-
stitutions and normal schools, together
with the supervision of educational
work in the Territories. He at once
in the hands of Hon. Mr. Balfour, who
is in charge of the educational depart-
ment, for the consideration of the
government where the matter at
present rests.

FROM OTTAWA.

"We are glad to hear that the local
government has taken this step. In
doing so they meet the wishes of prob-
ably every man in the North-West,
who takes an intelligent interest in
education. The announcement of the
government's action is especially
gratifying to the writer, as he was
among the first to advocate the engage-
ment of a competent educational
director and to mention Professor
Goggin's name in this connection.
The executive is to be congratulated
on thus consulting the desire of the
teachers and we hope nothing will
occur to prevent Mr. Goggin accepting
the offer which has been made him and
at once assuming charge of our edu-
cational affairs, in which his ability
and experience are urgently needed."

—Moose Jaw Spectator.
"Mr. Goggin has a great work before
him. He has the raw material to
work upon, and he will receive all the
support necessary to inaugurate a school
system which will not be surpassed in
the Dominion. Already our standard,
both for teachers and pupils, is a high
one, but there is a great work to be
done. The training of our own teachers
—a work in which Mr. Goggin has been
particularly successful in Manitoba—
has to be undertaken in a more system-
atic manner than heretofore. Our
school law, though it was much im-
proved last year, is by no means per-
fect, and Mr. Goggin's practical train-
ing and acknowledged administrative
abilities will, without doubt, be of great
service to the Council of Public Instruc-
tion."

—Leader.
Under Mr. Goggin there will be a
short time reasonable uniformity and
harmony prevailing the whole system
and the most promising and worthy
teachers will be better enabled to obtain
promotion, for the authorities will have
a means of finding them out. In such
matters, as in all matters, Mr. Goggin
is thoroughly conscientious, reliable
and impartial. Without these qualities
he could not have held his position in
Manitoba, under successive govern-
ments, and in the face of many changes.
This appointment marks a new era in
our educational affairs and will cer-
tainly reflect creditably upon the government
that made it."

FRIDAY, MARCH 10, 1893.

PASQUA PARAGRAPHS.

Cheer up lads, Spring is here! The "Firm" is as busy as ever. Where is the man that was going to have a "Grain Scraper" in running order all winter?

Miss Rothwell, of Regina, has secured the Eastview School for the summer term, and is now hard at work. Our friend, Mr. A. Mill, has had quite a busy time lately. He keeps the eastern trails well beaten.

A very social time was spent at Pasqua the other evening by a number of young folk. We were glad to see that the revival meetings, recently held here, had not interfered as seriously with their old time jollity as was expected. They are still able to "trip the light fantastic" as blithe as ever.

Mr. J. Allison has been laid up for a time with a very severe "Frost Bite," but is able once more to attend to business. "Hush a bye baby."

We see the Trustees of Lemington School have advertised for a teacher. Why not engage the fair young lady of former years? Perhaps "Paw" (for various reasons) prefers a gentleman teacher, but Goliath has a word to say in that. We would also like to hear the opinion of our friend Mr. Hutchison on the matter. But as usual he may have to "second the motion."

Mr. D. Dustin has purchased a valuable yoke of oxen from Mr. McCarter.

Miss A. Wilson expects to start for Lethbridge soon.

Mr. J. W. Stevenson is expected back shortly. He may find the fair sex as scarce an article in the East as in the West.

"Killing dead pork" is quite fashionable in our neighborhood.

Mr. W. Reynolds, of Mount Pleasant does not make as many calls round Pasqua as he formerly did. We hear he is to return to Manitoba shortly.

A PASQUITE.

CARMEL CHIRPINGS.

When spring opens Carmel will boom in the building line; three new dwellings and four new bachelor shacks will be erected to beautify the prairie.

One of our enterprising young bachelors Mr. Robert Parsons we understand has let the contract for his new dwelling.

Mr. William Powell is going to build a large addition to his house, which will add much to the appearance of Rose View Farm.

Mr. Steven Hudson succeeded in capturing the large coyote, which, for the last few years has been playing havoc with the poultry throughout this neighborhood. Steven captured the pest with a pitchfork.

Mrs. L. and P. King, of Marlborough, were visiting Mr. C. Langford this week.

Ordering Goods.

If the following suggestions about ordering goods offered by the Western Merchant were generally followed, dealers would receive no trouble and secure much more business in the filling of their orders.

1. Do not neglect the details of the paper, and do not neglect to be neglected, and it is not to be neglected after the order is made.

2. Do not mention a remittance and do not ask for a sheet of paper. The merchant will not send you and accompany him with a bill of exchange for the amount. The order will go to the order clerk.

3. Do not send an order and complaint about a former bill of goods, or a claim on the same paper. The complaint must go to the clerk for adjustment, while the order goes on to the order clerk. Write on separate sheets of paper.

4. It is better to write part of your order and then introduce some subject foreign to the order on the same sheet. The stock clerk who is getting out your order has no interest in your remarks which do not refer directly to the order before him.

5. Not signing orders is more common than anyone would suppose. It leads to much annoyance and delay. Even if you have a printed letter head with your name and business on it, it is no proof that you sent the order unless you put your name to it.

6. Stamp the envelope; the neglect of this often sends the letter to the dead letter

office instead of its proper destination. 7. Write plainly. Do not crowd what you have to say, but take another sheet of paper to finish. 8. Give full particulars concerning the article so that no mistake will be made. 9. After the shipper delivers the goods to the transportation company, and takes their receipt for them in good condition, his responsibility ceases, so if they do not reach you make your claim against the transportation company, for the shipper cannot do anything from his end of the line. Claims must be made from point of destination.

NOTES AND COMMENTS.

The organization of the new troop of cavalry, to be known as the Manitoba Dragoons, is being completed at Portage la Prairie and Virden. The military spirit is instilled in the young farmers and farmers sons of Manitoba and with their splendid physique and familiarity with exercise in the saddle, it can well be imagined that they will present an inspiring sight on review. The uniform of the new corps is to be a handsome scarlet tunic with buttons and flaps, heavy yellow braid and white facings, dark blue trousers with white stripes on each leg, brown belts, white helmets and gloves. The force cap is round. The Virden troop have already ordered 50 saddles.

If the San Francisco Call speaks the truth the introduction of electrical roads into New Orleans is likely to be followed by a plague of monster cats. It says that since the trolly was established in that city the cats have grown so big and so numerous as to constitute a nuisance and a menace. It is said that daily about the time that the cars stop running for the night, cats from everywhere begin to congregate along the track for electric food or baths they cannot tell which. Carefully selecting a suitable spot on the rail the cat in search of refreshment will lick the rail, and then lie down upon it a few minutes. Pretty soon he will roll over on the rail, and will stand with all four feet upon it, and with wild eyes, arched back and distended tail, will yowl and dance, and amuse himself for an hour at a time. An expert electrician, who was consulted on the subject, said that he could not imagine what effects the cats could get out of the rails; but whatever it may be, the cats of the city are said to be attaining an enormous size, never heard of before, and to keep themselves in wonderful good condition.

The latest exchanges from the North-West contain many signs of spring in the form of editorial reflections upon the character of the winter. Even as far north as Edmonton, where the cold has been so severe, perhaps as in any other well-settled district, not a single complaint against the climate has been put on the record. The meteorological observation has been made there, as elsewhere that the greatest degree of cold is always accompanied by the most remarkable absence of wind. The recent cold spell has not, therefore, been a time of suffering, but, on the contrary, of keen enjoyment. The farmers are up and doing now and preparing to put in the biggest crop that the North-West has ever received into its soil and since the winter has been in every respect a good one from the farmer's standpoint, they are also hoping for a phenomenal yield in the harvest of 1893.—Toronto Empire.

Mr. Haultain and Messrs. Davis, Davin and McDonald (Assiniboia) have had a lengthy conference with Sir John Thompson on North-West matters. One of the principal objects of Mr. Haultain's visit to Ottawa is to secure a change in the manner in which federal monies are appropriated for the public purposes of the Territories. As matters are now unless an appropriation is actually spent within the year for which it is voted, the money lapses. Often it has been found impossible to get public works completed in the territories within the fiscal year, and great inconvenience follows the lapsing of the vote. It is now desired to obtain power by which such appropriations will not lapse in the event of their not being expended before July 1 in each year. The deputation also asked for an additional appropriation for territorial uses and the granting of executive powers to the territories in the matter of appointments. The Premier promises to carefully consider the representations.

At a meeting of the British Chambers of Commerce it was proposed by the Birmingham Chamber—that as in the opti-

on of this meeting the future prosperity of British commerce must increasingly depend on our commercial relations with our colonies, and recognizing the fact that Canada has, by resolution of her parliament, invited the mother country to enter into an arrangement for reciprocal preferential duties, we hereby urge upon the Government the necessity of taking that invitation into their immediate and most serious consideration. The resolution of the Canadian Parliament is as follows:—"That if and when, the Parliament of Great Britain and Ireland admits Canadian products to the markets of the United Kingdom upon more favorable terms than it accords to the products of foreign countries, the Parliament of Canada will be prepared to accord corresponding advantages by a substantial reduction in the duties which it imposes upon British manufactured goods."

A Scandinavian paper, the Ottawa Danerö, has the following to say regarding Goldwin Smith:

"Does Mr. Goldwin Smith actually believe that Canada would feel happier if the United States should annex us and allow us to take part in the unreasonable and expensive presidential elections and the offspring hereof, slander, libel and hunting for positions."

We firmly believe that Canada and her inhabitants are best served by continuing to live under the old English flag and under the supremacy and reign of her majesty the Queen, a reign that is so liberal and just that it is hardly felt by any, and as to liberty and safety give as a guarantee that which the United States could not surely give better.

Language like Prof. Goldwin Smith's will only cause English capitalists to hesitate in investing money in Canadian enterprises, as it creates the impression that the majority of Canadians wish to see the star-spangled banner float from Parliament buildings.

It seems to us time to give those who identify themselves with such misleading expressions a little rap on the fingers."

J. H. ROSS, AGENT.

HISTORY!

Never before in the history of this new country has there been such interest manifested among the farmers, in the matter of treating seed grain for smut.

There are no two opinions as to the best agent for this purpose, it being conceded on all hands that Bluestone ranks first. We have bought our Bluestone this year from sample, and were surprised to learn so many different qualities were being offered. We bought the best, not the cheapest. Pure sulphate of Copper, known as Bluestone, is just as staple as the metal, and of necessity soon finds its level in price. We only ask of you to call and inspect our stock, which we are pleased to learn has been endorsed by the Winnipeg Board of Trade.—10 cents per pound.

W. W. BOLE.

The Moose Jaw Times.

FRIDAY, MARCH 10, 1893.

ALEX. WILSON, Blacksmith.

The February issue of the Aurora, published by the Rupert's Land Industrial School is out. It is filled with interesting matter concerning the school and Church of England. Among the contents are compositions by some of the Indian students. The typographical appearance is creditable to the staff.

General sources of information are not always handy or reliable and we are fortunate in finding in Waghorn's Guide a compendium of the most useful tables provided for us on travel by rail, stage, Ocean and Lake, and on all matters of general business in these Provinces. The tables are selected with care and kept well up to date. The list of contents is a large one and embraces information on all subjects that a business man, traveller and visitor can possibly want, and has become a standard reference among us. The March issue just out is well up to the average.

A supply of the new form of post card, a Canadian letter card and two new sets of stamps, of the value of fifty cents and twenty-five cents each, have been received at the Moose Jaw post office. The new postcard will especially meet with favor, for it is much larger than the old one, being about the same size of the United States postal card. The Canadian letter card is an exceedingly handy affair, and something of a novelty. It is pale blue in color, being light and smooth to write upon, and like a double postcard. It is perforated all around, and the three lower edges outside the perforation are gummed. On the front are the words "Canada Letter Card," and the imprint of a three-cent stamp in the right corner on crimson ink. The user writes his communication on the two inside pages, fastens the card with the mucilage and all the receiver has to do is to tear off the perforated strip and there is the letter. The letter cards sell at three cents each, and do away with the carrying of paper, envelopes and stamps for those who do not indulge in long letters. The new fifty-cent stamp is blue in color and the twenty-five-cent stamp is red. The design is the head of the Queen wearing the widow's cap and is very neat.

COMMUNICATIONS.

This Times does not hold itself responsible for the opinions expressed by correspondents. No communication will be inserted unless the name of the writer accompanies it, not necessarily for publication, but as a guarantee of good faith.

The Year's Immigration.

To the Editor of the TIMES.

DEAR SIR:—

Will you kindly inform me through the columns of the TIMES whether we have a Board of Trade in Moose Jaw, or whether it is defunct from natural causes.

This is the season of the year when we may naturally expect an influx of immigrants, and from all reports we have good reason to expect a large immigration into this district, and accordingly a live Board of Trade in what this Town requires, to make provision for this immigration. Apparently neither the Town Council nor the Board of Trade are doing anything in the matter. The Council certainly deserve credit for getting the envelopes with a description of the town printed on the back. This is a step in the right direction, as far as regards advertising the capabilities of the town and its location as the centre of the best wheat and stock growing district of the Territories, but even the advertisement on envelopes does not give anyone the least idea about the district itself, confining itself as it does to a mere detailed description of the town. The purpose would have been better served by a full description of the district, because if the district grows, why the town is sure to grow also.

However, I think the Board of Trade are the real delinquents in this matter. They should bestir themselves and make some provision for the housing of immigrants and their stock, etc. The Regina Board of Trade set us a good example in this respect; they never lose an opportunity of advertising their district by pamphlet or otherwise, while we merely sit and twiddle our thumbs and hope that a gracious Providence will see our needs and send us kindly help in the shape of a good immigration, without our taking any trouble. This, Sir, will never fit our country with desirable immigrants nor will we find our lands settled until the rest of the districts are first settled. This is not right as we know we have the best land to be found anywhere for wheat and stock raising, and plenty of water now to be had everywhere. The Sun Road will be here this summer. We have an excellent chance of winning the prize for wheat at the World's Fair.

Now is our time, Mr. Editor, to shake off this lethargy and bestir ourselves like men. Now is the time to send good men from this district to Ontario and the eastern provinces, to the Old Country and also to the States armed with a good healthy description of this district. We can get passes for these men, and we will reap one hundred-fold any expense that may be incurred by us.

Hoping you will see your way to reconvert the Board of Trade and make that body of business (I) men do a little business, not for themselves, but for the whole community.

I am, Sir,

Yours truly,

Agriola.

Moose Jaw, March 8th, 1893.

Out on Silver.

WINNIPEG, Mar. 8.—At a meeting of the Bankers' Association of Winnipeg held last Friday it was decided that Americansilver would be received by the banks at the following rates of discount after the 1st of April next:
Silver dollar—80c.
Half dollar—40c.
Quarter—20c.
Dimes—5c.

Awarding of Great Contracts.

The Canadian Pacific railway company have commenced awarding their contracts for the years' supply of coal. In all their will be in the neighborhood of one million tons required to be delivered at various points along the line. Of this 125,000 tons are to be delivered at Montreal, and contracts for 100,000 tons have already been awarded. It is understood that a Montreal firm who draw their supply from Nova Scotia mines, are the successful tenderers. The remainder of the contracts will be awarded within the next two weeks.

Parley "Wants to Know."

OTTAWA, March 8th.—In the senate yesterday Parley asked whether the government proposed to compel the present proprietors of the Great North West Central and the Manitoba and North West railway company to complete the construction of those railways be abandoned.

Hon. Mr. Bowell promised to submit the matter to the Government; if Parley's wish were carried out the Government would have to remodel its system of aiding Northwest railway enterprises.

The Indian Report.

OTTAWA, March 8.—The report of the Indian department was brought down to-night. It says that the condition of Indian affairs during the year. Reference is made to the progress of the Indians in the Territories. They are described as fast advancing in the march of civilization. The net decrease in expenditures on their account in Manitoba and the Northwest Territories last year, was \$76,000 compared with the previous year. The Indian population continues to decrease.
